

# Florafleur®

Jiffy Products International BV, a company within the Jiffy group of companies, specializes in substrates with subsidiaries and representatives throughout The Netherlands and abroad. Jiffy Products International BV has substrate production locations in The Netherlands at 3 locations; Coevorden, Bleiswijk and Moerdijk, with additional facilities in Sweden and Estonia.

### Global experience and support

Jiffy Products International BV is internationally represented translating into corporate expertise and a well established knowledge of your local situation, demand and opportunities. Jiffy's specialists constantly review new developments and opportunities, which are then shared with their customers. Together with Jiffy you can take more control of your own future in growing.

Based on our crop and product knowledge, Jiffy has brought a wide range of substrates together under the Florafleur brand. All mixes offered under the Florafleur name, have a proven track record on

performance at many different grower locations. The mixes in the Florafleur range are of high quality and guarantee a high success rate. The water retention of the mixes is excellent and takes care of a high germination rate.

### Quality

Quality is the main ingredient of the products delivered by Jiffy. We monitor the products' quality throughout the entire production chain, from extraction from their source to processing by the buyer. All Jiffy substrates are produced according to our high standards to secure the customer a uniform quality product every single time.

As we cover the entire production chain, risk factors are excluded at a very early stage to leave absolutely nothing to chance.

Art. No.	Description	Fraction	Ph	EC
100185	PG 004 Florafleur	Medium Mix	5,20	0,80
100645	PG 004A Florafleur	Coarse Mix	6,00	0,90
