

Speedypot

Jiffy Speedypot is the latest generation of the "shrink-wrap" series in the Jiffypot family, offering a 100% biodegradable 'green innovative' container solution to the horticultural industry.

What sets the Jiffy Speedypot apart from all other containers in the industry is that, while it has all the advantages of a plastic container, being clean, strong, brightly coloured, custom printable and mechanically easy to handle, it still provides you with the benefits of the proven Jiffy Pot 'Open Wall' concept.

The "wrap" around the top of the Jiffy Speedypot is made of 100% biodegradable PLA making the pot attractive and easy to handle, with the added advantage for the end user of not having to dispose of the container, instead planting the plant, pot and label directly into the garden.

The label around the rim of the Jiffy Speedypot can be custom printed providing the customer with all the needed plant, and company logo/ information, saving you the expense and labour required of an additional label.

"Rigid Wall" and "Open Wall" containers

A container with a rigid wall promotes root spiraling resulting in deformed root systems giving poor garden performance. To avoid deformed roots and maximize plant establishment in the garden, the innovative Jiffy

Speedypot combines both the Rigid and Open Wall concepts in one single unit, combining the best of both worlds. The top of the Jiffy Speedypot, clean, strong, attractive whereas the bottom half still provides you with the proven Jiffypot "open wall" container concept allowing the roots to grow through the pot wall to get 'air pruned'. The air pruning process results in buds on the root tips at the edge of the container. When a Jiffy Speedypot is transplanted into the garden, the root buds spring alive, developing rapidly into a healthy root system assuring fast establishment of any plant in the garden.

No other plant container in the industry combines easy handling, good looking, economical, custom design, 100% degradability and 'Best For Plant Establishment' in a single container as the Jiffy Speedypot does.

Jiffy Speedypot, 'Easy for you, Easy for your customer'

- 100% Biodegradable Plant Container and label in One.
- Super healthy roots and fast establishment in any flowerbed.
- Generic or custom labels available.
- Save cost of extra tag and labour to handle these tags.
- Strong rigid and 'soft open wall' concept in one unit.
- No disposal of pot, no disposal of label.
- Healthier plants, Happier customer.
